NOTIFICATION OF TRANSMITTAL
OF COPIES OF TRANSLATION
OF THE INTERNATIONAL PRELIMINARY REPORT
ON PATENTABILITY
(CHAPTER I OR CHAPTER II
OF THE PATENT COOPERATION TREATY)
(PCT Rules 44bis.3(c) and 72.2)

To:		•	
			٠

GRIMM, Ekkehard Edith-Stein-Strasse 22 63075 Offenbach/Main ALLEMAGNE

Date of mailing (day/month/year) 09 November 2006 (09.11.2006)		
Applicant's or agent's file reference 240 680	IMPORTANT NOTIFICATION International filing date (day/month/year) 23 March 2005 (23.03.2005)	
International application No. PCT/EP2005/003110		

1. Transmittal of the translation to the applicant.

patentability (Chapter II).

The International Bureau transmits herewith a copy of the English translation of the inte- patentability (Chapter I).	rnational preliminary	report on
<i>;</i>	•	
The International Bureau transmits herewith a copy of the English translation of the inte	rnational preliminary	report on

2. Transmittal of the copy of the translation to the designated or elected Offices.

The International Bureau notifies the applicant that copies of that translation have been transmitted to the following designated or elected Offices requiring such translation:

None

The following designated or elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only upon their request:

AE, AG, AL, AM, AP, AT, AU, AZ, BA, BB, BG, BR, BW, BY, BZ, CA, CH, CN, CO, CR, CU, CZ, DE, DK, DM, DZ, EA, EC, EE, EG, EP, ES, FI, GB, GD, GE, GH, GM, HR, HU, ID, IL, IN, IS, JP, KE, KG, KP, KR, KZ, LC, LK, LR, LS, LT, LU, LV, MA, MD, MG, MK, MN, MW, MX, MZ, NA, NI, NO, NZ, OA, OM, PG, PH, PL, PT, RO, RU, SC, SD, SE, SG, SK, SL, SM, SY, TJ, TM, TN, TR, TT, TZ, UA, UG, US, UZ, VC, VN, YU, ZA, ZM, ZW

3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s).

The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability (Chapter II).

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned within the applicable time limit (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

The International Bureau of WIPO 34, chemin des Colombettes 1211 Geneva 20, Switzerland Authorized officer

Ellen Moyse

Box	x No. I	Basis of this opinion
i.	With filed	regard to the language, this opinion has been established on the basis of the international application in the language in which it was unless otherwise indicated under this item.
		This opinion has been established on the basis of a translation from the original language into the following language
	-	, which is the language of a translation furnished for the purposes of international search (under
	•	Rule 12.3 and 23.1(b)).
2.	With	regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed nation, this opinion has been established on the basis of:
	a .	type of material
		a sequence listing
		table(s) related to the sequence listing
	b.	format of material
		in written format
		in computer readable form
	c.	time of filing/furnishing
		contained in the international application as filed.
		filed together with the international application in computer readable form.
		furnished subsequently to this Authority for the purposes of search.
3.	Ц	In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
4.	Addi	itional comments:

- 2. Citations and explanations:
 - Reference is made to the following document:

 D1: PATENT ABSTRACTS OF JAPAN vol. 2003, no.

 12, 5 December 2003 (2003-12-05) & JP 2004

 066322 A (MATSUSHITA ELECTRIC IND CO LTD), 4

 March 2004 (2004-03-04)
 - Document D1 is considered to be the closest prior art. It discloses (the references between parentheses relate to said document) a

method of producing holes having a large aspect ratio in metallic materials as well as stratified metallic materials and those having at least one ceramic layer by means of laser radiation, wherein the intensity of the laser beam is set as a function of the required change in hole radius with the hole depth,

from which the subject matter of independent claim 1 differs in that

the spatial distribution of the intensity in the laser beam, based on the varying base of the

PCT/EP2005/003110

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement.

hole, is set such that the intensity 1 decreases within the section w_0 with the distance w from the laser beam axis by the value ΔI , this decrease is monotonous, and the values for the spatial change IM in the intensity I and the section w_0 are set to be so large that a hole radius r_B larger than the section w_0 ($r_B > w_0$) is achieved, the section w_0 being the radius of the laser beam.

2.1 The subject matter of claim 1 is therefore novel (PCT Article 33(2)). The problem addressed by the present invention can therefore be considered that of

completely expelling the melt during drilling in the direction of the incident laser radiation from the hole shaft is ensured without deposits of solidified melt at the hole edge.

This problem is solved, based on the method with the abovementioned features, in that the spatial distribution of the intensity in the laser beam, based on the varying base of the hole, is set such that the intensity 1 decreases within the section w_0 with the distance w from the laser beam axis by the value ΔI , this decrease is monotonous, and the values for the spatial change IM in the intensity I and the section w_0 are set to be so large that a hole radius r_B larger than the section w_0 ($r_B > w_0$) is achieved, the section w_0 being the radius of the

Box No. V

Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability: citations and explanations supporting such statement

laser beam. The section w_0 is thus the radius of an area perpendicular to the laser beam axis obtaining 86% of the laser power.

2.2 The solution to this problem proposed in claim 1 of the present application involves an inventive step for the following reasons (PCT Article 33(3)):

The values for the spatial change ΔI in the intensity I and the section w_0 are set so large that a hole radius r_B larger than the section w_0 $(r_B>w_0)$ is achieved. ΔI and w_0 should be selected to be so large that the hole is sufficiently wide for ensuring the abovementioned effect of not dissipating the laser beam through the upflowing melt.

2.3 Claims 2-26 are dependent on claim 1 and therefore likewise meet the PCT requirements for novelty and inventive step.

International application No.
PCT/EP2005/003110

Box No. VIII

Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Claim 1 is not clear and does not meet the requirements of PCT Article 6 insofar as the subject matter for which protection is sought is not clearly defined. The following statements do not enable a person skilled in the art to determine which technical features are necessary for carrying out the stated function:

"that a hole radius r_B larger than the section w_0 $(r_B>w_0)$ is achieved, the section w_0 being the radius of the laser beam."
